Applicant has amended claim 1 such that it presently includes the limitations of original claim 8.

In *Sengupta and Colvin et al.*, which were applied against original claims 1 and 11, the dielectric materials that were employed as encapsulants for the phase change materials were polystyrene and polyamide respectively. Without knowing anything other than the general class of materials to which the encapsulants belong, it cannot be determined with any degree of certainty whether said encapsulants would be able to continue to accommodate the phase change materials upon their conversion from a solid state to a liquid-like state. It is for this reason that original claim 8 and, hence, amended claim 1 are allowable. An updated survey of the prior art did not yield any additional examples of dielectric material-encapsulated phase change materials that are dispersed throughout a polymer resin. Accordingly, claims 1-20 are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
